The Guild name is synonymous with 12-string acoustic guitars. We've been setting the standard since the '60s.

Based on the classic Guild G-312 model, the all-new G-312CE Standard is an acoustic-electric dreadnought 12-string with a big, bold voice. It features a solid Sitka spruce top with red spruce bracing and solid rosewood back and sides that produce a rich, powerful sound with an excellent balance of sweet, sparkling mids and highs and warm, focused bass.

The slim, satin finish mahogany neck gives it all of the comfortable feel and smooth playability that players have come to expect from Guild, while the onboard 18-volt D-TAR® Wave-Length™ pickup system provides a transparent and natural sound with enhanced dynamic range and headroom for exceptional amplified performance.

Other premium features include ivoroid body binding, pearl inlays, and bone nut, saddle, and bridge pins.
