1 General information

This manual contains important instructions for the safe operation of the unit. Read and follow the safety instructions and all other instructions. Keep the manual for future reference. Make sure that it is available to all those using the device. If you sell the unit please make sure that the buyer also receives this manual.

Our products are subject to a process of continuous development. Thus, they are subject to change.

1.1 Further information

On our website (www.thomann.de) you will find lots of further information and details on the following points:

Download	This manual is also available as PDF file for you to download.
Keyword search	Use the search function in the electronic version to find the topics of interest for you quickly.
Online guides	Our online guides provide detailed information on technical basics and terms.
Personal consultation	For personal consultation please contact our technical hotline.
Service	If you have any problems with the device the customer service will gladly assist you.

1.2 Notational conventions

This manual uses the following notational conventions:

Letterings

The letterings for connectors and controls are marked by square brackets and italics.

Examples: *[VOLUME]* control, *[Mono]* button.

Displays

Texts and values displayed on the device are marked by quotation marks and italics.

Examples: *'24ch'*, *'OFF'*.

Instructions

The individual steps of an instruction are numbered consecutively. The result of a step is indented and highlighted by an arrow.

Example:

1. ➤ Switch on the device.
2. ➤ Press *[Auto]*.
 - ⇒ Automatic operation is started.
3. ➤ Switch off the device.

Cross-references

References to other locations in this manual are identified by an arrow and the specified page number. In the electronic version of the manual, you can click the cross-reference to jump to the specified location.

Example: See ➤ *'Cross-references' on page 8.*

1.3 Symbols and signal words

In this section you will find an overview of the meaning of symbols and signal words that are used in this manual.

Signal word	Meaning
DANGER!	This combination of symbol and signal word indicates an immediate dangerous situation that will result in death or serious injury if it is not avoided.
WARNING!	This combination of symbol and signal word indicates a possible dangerous situation that can result in death or serious injury if it is not avoided.
CAUTION!	This combination of symbol and signal word indicates a possible dangerous situation that can result in minor injury if it is not avoided.
NOTICE!	This combination of symbol and signal word indicates a possible dangerous situation that can result in material and environmental damage if it is not avoided.

Warning signs	Type of danger
	Warning – high-voltage.
	Warning – flammable substances.
	Warning – hot surface.
	Warning – harmful or irritating substances.
	Warning – danger zone.

2 Safety instructions

Intended use

This device is intended to be used to produce artificial fog by vaporising fog fluid. Use the device only as described in this user manual. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

This device may be used only by persons with sufficient physical, sensorial, and intellectual abilities and having corresponding knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

Safety

DANGER!

Danger for children

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Ensure that children do not detach any small parts (e.g. knobs or the like) from the unit. They could swallow the pieces and choke!

Never let children unattended use electrical devices.

DANGER!

Electric shock caused by high voltages inside

Within the device there are areas where high voltages may be present. Never remove any covers.

There are no user-serviceable parts inside.

DANGER!

Electric shock caused by short-circuit

Always use proper ready-made insulated mains cabling (power cord) with a protective contact plug. Do not modify the mains cable or the plug. Failure to do so could result in electric shock/death or fire. If in doubt, seek advice from a registered electrician.

WARNING!

Risk of burns from flammable liquids

The use of flammable liquids in this device may cause severe burns and damage to property.

Always use approved fog fluids. Never fill flammable liquids into the tank of the device.

WARNING!

Risk of burns

The generated fog at the fog nozzle is hot and can cause burns. Occasionally hot fluid drops may escape from the nozzle.

The distance of persons and objects to the fog nozzle must be at least fifty centimetre (1.6 feet).

Do not touch the fog nozzle during and shortly after operation. It becomes very hot and may cause burns even several hours after switching off the device.

WARNING!

Risk of slipping caused by condensation

Fog machines can produce condensation. Do not direct the fog to floors. Floors and surfaces can become slippery by condensed fog.

Check at regular intervals whether it is possible to walk on the floors without a slipping hazard, and, if necessary, remove the condensation.

WARNING!

Health hazard caused by fog fluid handling

Fog fluid does contain glycols complying with the regulations for foodstuffs. However, it may be harmful if swallowed.

Do not induce vomiting. Seek medical advice immediately. Keep fog fluid in a safe place. If the fog fluid comes into contact with eyes rinse thoroughly with water.

CAUTION!

Possible respiratory problems

The device can be operated safely only with the approved fog fluid. The use of other fluids can release toxic gases. Claims for damages caused by the use of non-approved fluids shall be excluded.

Do not create fog in closed or poorly ventilated areas.

Do not expose persons with health problems (such as allergic respiratory conditions, asthma) to artificial fog.

NOTICE!

Risk of fire

Do not cover the device nor any ventilation slots. Do not place the device near any direct heat source. Keep the device away from naked flames.

NOTICE!

Operating conditions

This device has been designed for indoor use only. To prevent damage, never expose the device to any liquid or moisture. Avoid direct sunlight, heavy dirt, and strong vibrations.

NOTICE!

Power supply

Before connecting the device, ensure that the input voltage (AC outlet) matches the voltage rating of the device and that the AC outlet is protected by a residual current circuit breaker. Failure to do so could result in damage to the device and possibly injure the user.

Unplug the device before electrical storms occur and when it is unused for long periods of time to reduce the risk of electric shock or fire.

3 Features

This fog machine is suitable for use in clubs, bars, discotheques and on stages

Special features of the device:

- Coloured fog effects by integrated LEDs
- Control via DMX (7 channels)
- Manual control via wired and infrared remote control (included)
- Vertically and horizontally usable
- Suitable for mobile use due to compact design

4 Installation

Unpack and carefully check that there is no transportation damage before using the unit. Keep the equipment packaging. To fully protect the device against vibration, dust and moisture during transportation or storage use the original packaging or your own packaging material suitable for transport or storage, respectively.

The device requires 20 cm clearance at the sides and above. Place the unit on a flat, stable surface. The device must never be operated in a more than 15° tilted position.

Insert the fog fluid container into the unit and then mount the supplied safety bracket on the device. To do so, unscrew the two bolts on the left and right of the opening for the fog fluid container from the housing. Put on the safety bracket and secure it with the two bolts on the housing (↶ *'Side view, device is lying'* on page 22).

Insert the battery into the remote control

Push the lock of the battery holder towards the centre of the housing and pull out the battery holder like a drawer. Insert the battery. The battery is correct, if the positive pole points to the housing bottom of the remote control. Slide the battery holder back into the remote until it clicks into place.

5 Starting up

Establish all connections as long as the unit is switched off. Use the shortest possible high-quality cables for all connections.

NOTICE!

Possible data transmission errors

For error-free operation make use of dedicated DMX cables and do not use ordinary microphone cables.

Never connect the DMX input or output to audio devices such as mixers or amplifiers.

Connections in DMX mode

Connect the DMX input of the device to the DMX output of a DMX controller or another DMX device. Connect the output of the first DMX device to the input of the second one, and so on to form a daisy chain. Always ensure that the output of the last DMX device in the daisy chain is terminated with a resistor ($110\ \Omega$, $\frac{1}{4}\text{ W}$).

6 Connections and operating elements

Side view, device is lying

1	Carrying handle.
2	Fog fluid container with screw-cap.
3	Fastening screws for the safety bracket of the fog fluid container.
4	9 × colour LEDs (3 × red, 3 × green, 3 × blue).
5	Fog nozzle.

7 Operating

Filling the unit

**NOTICE!****Possible damages caused by unsuitable fog fluid**

Fog liquids not approved by the manufacturer may permanently damage the unit.

Only use the fog fluids listed on www.thomann.de and follow their instructions for use.

First, make sure the unit is disconnected from the mains.

Open the screw-cap of the liquid container and fill in the fog fluid. Make sure that no fluid is spilled or gets into the device. The easiest way is using a funnel. The container capacity is 2.5 litre.

Screw the cap firmly back on.

Turning the unit on

NOTICE!

Fire hazard

Do not operate the machine unattended.

Connect the device to the power grid and turn it on with the main switch. During the warm-up time of about 3 minutes (± 30 s) the display shows 'UP'. Once the device is operational, the display will change to 'rEAD'.

When the machine receives a DMX signal, the display shows the set DMX address, even during start-up and warm-up time. Then the unit does not respond to manual control commands, you only have the option to adjust the DMX address via the device menu.

When operating, always ensure that there is sufficient fog fluid in the liquid container to avoid no-load running.

In all modes, the maximum duration of a fog burst is 6 seconds, the charging time between two fog bursts is also about 6 seconds.

Operating mode 'Manual control'

This mode can only be selected when no DMX controller is connected and turned on.

In this mode, the fog output can be triggered and deactivated using the *[MANUAL SWITCH]* button or via one of the two remote controls.

Use the button *[MANUAL SWITCH]* on the device and the manual fog trigger button on the wired remote control (🔗 *'Manual control via wired remote control' on page 35*) to control the duration of the fog burst. Press the *[ON]* button of the IR remote control (🔗 *'Manual control via IR remote control' on page 35*) to trigger an even fog burst with full intensity.

The colour effect can be adjusted via the menu of the device.

1. ➤ Press *[FUNC]* to open the device menu.
2. ➤ Press *[FUNC]* again or use one of the arrow buttons ▼ and ▲ until the display shows 'CoLo'.
3. ➤ Confirm with *[ENTER]*.
⇒ The last set value 'Co1' ... 'Auto' is flashing in the display.
4. ➤ Select the desired colour setting using the arrow buttons ▼ and ▲, see the following chart.
5. ➤ Confirm the input with *[ENTER]*.

Display	Colour setting
'oFF'	LEDs off
'Co1'	Red steady light
'Co2'	Green steady light
'Co3'	Blue steady light
'Co4'	Red / green steady light
'Co5'	Red / blue steady light
'Co6'	Blue / green steady light
'Co7'	Red / green / blue steady light
'Auto'	Automatic colour change, all LEDs

Manual control via wired remote control

If the device is not controlled by DMX you can trigger and regulate the fog output with the red push button on the wired remote control. When you release the button, or after about 6 seconds the device stops the fog output. After the charging time of about 6 seconds you can trigger another fog burst.

Connect the wired remote control to the connection socket *[WIRE CONTROLLER]* on the operating panel of the device. Make sure that the two indicator LEDs on the remote control light up.

Manual control via IR remote control

If the device is not controlled via DMX, you can control the fog output using the keys *[ON]* and *[OFF]* on the remote control. Press *[ON]* to trigger an even fog burst of maximum 6 seconds with maximum intensity. Press *[OFF]* to stop the fog output.

Activate the infrared port on the device.

1. ➤ Press *[FUNC]* to open the device menu.
2. ➤ Press *[FUNC]* again or use the arrow buttons ▼ and ▲ until 'InFr' appears in the display.
3. ➤ Confirm with *[ENTER]*.
4. ➤ Use the arrow buttons ▼ and ▲ to change between 'on' (IR port on the device is turned on) and 'off' (IR port on the device is turned off).
5. ➤ Confirm the input with *[ENTER]*.

Operating mode 'DMX'

Set the DMX address of the device using the menu control.

1. ➤ Press *[FUNC]* to open the device menu.
2. ➤ Press *[FUNC]* again or use the arrow buttons ▼ and ▲ until 'Addr' appears in the display.
3. ➤ Confirm with *[ENTER]*.
⇒ The last set value '1' ... '506' is flashing in the display.
4. ➤ Select the desired address with the arrow buttons ▼ and ▲.
5. ➤ Confirm the input with *[ENTER]*.

Make sure that this number matches the configuration of your DMX controller.

DMX assignment

Channel	Value	Function
1	Amount of fog	
	0...9	No fog output (0 %)
	10...255	Fog output (100 %)
2	Brightness of all LEDs	
	0...255	LEDs off to maximum brightness
3	Colour effect	
	0...20	All LEDs off
	21...35	Red steady light
	36...50	Green steady light
	51...65	Blue steady light
	66...80	Red / green steady light

Channel	Value	Function
	81...95	Red / blue steady light
	96...110	Blue / green steady light
	111...127	Red / green / blue steady light
	128...255	Automatic colour change, all LEDs, increasing speed
4	Stroboscope effect	
	0...9	Stroboscope effect off
	10...255	Stroboscope effect from slow to fast
5	Intensity colour effect red	
	0...255	Red LEDs off to maximum brightness when channel 3 \leq 20
6	Intensity colour effect green	
	0...255	Green LEDs off to maximum brightness when channel 3 \leq 20

Channel	Value	Function
7	Intensity colour effect blue	
	0...255	Blue LEDs off to maximum brightness when channel 3 \leq 20

Turning the unit off

Turn off the power using the main switch. Transport the device only when it is completely cooled down. To avoid leaking fog fluid during transport, you should transport the device only with empty fluid container.

8 Technical specifications

Fluid container capacity	2.5 l
Fluid consumption	approx. 40 ml / min
Warm-up time	3 min (\pm 30 s)
Heater power	820 W
For burst duration, max.	approx. 6 s
Charging time between fog bursts	approx. 6 s
Fog burst reach	3 m (\pm 30 cm)
LEDs	3 \times red
	3 \times green
	3 \times blue
Operating voltage supply	230 V \sim (AC), 50 Hz
Fuse	5 A / 250 V, slow-blow, 5 mm \times 20 mm

Power consumption	850 W
Dimensions (W × D × H)	190 mm × 340 mm × 300 mm
Weight	8.9 kg

9 Plug and connection assignments

Introduction

This chapter will help you select the right cables and plugs to connect your valuable equipment so that a perfect light experience is guaranteed.

Please take our tips, because especially in 'Sound & Light' caution is indicated: Even if a plug fits into a socket, the result of an incorrect connection may be a destroyed DMX controller, a short circuit or 'just' a not working light show!

DMX connections

The unit offers a 3-pin XLR socket for DMX output and a 3-pin XLR plug for DMX input. Please refer to the drawing and table below for the pin assignment of a suitable XLR plug.

Pin	Configuration
1	Ground, shielding
2	Signal inverted (DMX–, 'cold signal')
3	Signal (DMX+, 'hot signal')

10 Troubleshooting

In the following we list a few common problems that may occur during operation. We give you some suggestions for easy troubleshooting:

Symptom	Remedy
The unit does not work	Check the mains connection and the main fuse.
No haze output	<ol style="list-style-type: none"> 1. Check the fluid level in the fog container. 2. Switch the device off and check the hose that leads into the fluid container for flow.
No response to the DMX controller	<ol style="list-style-type: none"> 1. Check the address settings and the DMX polarity. 2. Try using another DMX controller. 3. Check to see if the DMX cables run near or alongside to high voltage cables that may cause damage or interference to DMX interface circuits.

If the procedures recommended above do not succeed, please contact our Service Center. You can find the contact information at www.thomann.de.

11 Cleaning

NOTICE!

Possible damages caused by unsuitable cleaning agents

Cleaners not approved by the manufacturer may permanently damage the unit.

Only use the fog machine cleaners listed on www.thomann.de and follow their instructions for use.

Clean the appliance after every 30 operating hours, or if it was not in use for a longer period of time.

Procedure

1. ➤ Make sure that the device is turned off, disconnected from the mains and completely cooled down.
2. ➤ Place the unit in a well ventilated place.
3. ➤ Take the suction hose out of the fluid container of the fog machine and put it into the bottle with the cleaning fluid.
4. ➤ Connect the device to the mains and turn it on with the main switch.
5. ➤ Wait until the required operating temperature has been reached.

- 6.** ➤ Switch the unit to continuous operation and release fog for about 20 seconds.
- 7.** ➤ Put the suction hose back into the fluid container of the fog machine and release fog for another 20 seconds. This rinses the pipes.
 - ⇒ The cleaning is completed.

12 Protecting the environment

Disposal of the packaging material

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling.

Ensure that plastic bags, packaging, etc. are properly disposed of.

Do not just dispose these materials with your normal household waste, but make sure that they are fed to a recovery. Please follow the notes and markings on the packaging.

Disposal of batteries

Batteries must not be disposed of as domestic waste or thrown into fire. Dispose of the batteries according to national or local regulations regarding hazardous waste. To protect the environment, dispose of empty batteries at your retail store or at appropriate collection sites.

Disposal of your old device

This product is subject to the European Waste Electrical and Electronic Equipment Directive (WEEE). Do not dispose with your normal household waste.

Dispose this device through an approved waste disposal firm or through your local waste facility. When discarding the device, comply with the rules and regulations that apply in your country. If in doubt, consult your local waste disposal facility.
