Price: \$99

Availability: March 2011

Studio quality guitar input for iPad, iPhone, iPod touch and Mac

JAM brings the legendary sound quality of Apogee to iPad™, iPhone®, iPod touch® and Mac for just \$99. Now guitarists can have a pocket-sized, plug in and play interface at an unprecedented price and experience ultimate tone with the guitar amps and effects in Apple's GarageBand software or other compatible applications.

PureDIGITAL technology delivers pristine sound quality

JAM is a premium digital converter featuring PureDIGITAL technology which delivers your guitar's true tone to your iPad, iPhone, iPod touch, or Mac without compromise. JAM is the first high quality interface that makes a digital connection to both iOS devices and Mac. You will notice the sonic difference between JAM and other similar products immediately.

Crank it up and dial it in with easy level control

JAM features an input gain control knob. This rotary style wheel is conveniently located on the side of JAM for easy thumb access and allows you to dial in the level of your guitar without accessing software.

Ready to rock - Status and level indication

It's easy to tell if JAM is connected properly by the status light on the top panel. If it's green, you are ready to rock and the light becomes your input level indicator. If it turns red, you are rocking too hard and you need to turn it down with the gain control knob.

Plug in and play

JAM is designed to work on the iPad, iPhone, iPod touch and Mac. And there's no difficult set up or configuration. Just plug in, open your software and JAM.

JAM is great for...

Beginners and seasoned players who want a high quality guitar sound for practicing, recording, or just jamming on both iPad and Mac.

Did you know?

JAM is a true digital device featuring special circuitry designed specifically for guitar and bass. The Apogee engineers responsible for JAM's sound quality have created professional audio recording products found in recording studios around the world and heard on countless hit records.
