

BEATTHANG MOBILE MUSIC PRODUCTION

BEAT THANG combines **sampling, sequencing and a massive sound library** with an easy to use performance interface. All this is packed into a **portable, rugged, all metal chassis**, making it the most powerful, mobile music production instrument on the planet. **Over 3000 original sounds** and chops were custom created for this extraordinary library. It doesn't matter if your style is **Hip-Hop, Reggaeton, Soul, Funk, Electronica, Rock, or Alien**, **BEAT THANG** has the sounds you need to create bangin' tracks. The Beat Kangz lived in the studio for two years painstakingly recording and tweaking the sickest sounds from **classic drum kits, vintage instruments, rare electronics, exotic percussion**, and many improvised sound sources. All were performed and recorded through a menagerie of high-end digital and analog devices, meticulously preserving each sample's warmth and character. The Beat Kangz mastered each sample so you have **trunk bangin' drop, aggressive kicks and snares, rich strings, chunky guitars, tripped out synths and tons of grit, depth, and low end** to create with. You can also **load or record your own samples** to create custom kits and unique instruments of your own.

For more information, ordering info, and exciting updates, visit WWW.BEATTHANG.COM

SPECIFICATIONS

- **Audio: CD quality 16bit / 44.1kHz:** sampling, playback and export.
- **Stereo XLR/Line input** with Phantom Power and input gain control.
- **16 tracks** with playable mute and solo functions.
- **2 X 1/4" headphones out** for two listeners at one time.
- **1/4" stereo master out** (balanced).
- **MIDI: In and out**, Plus USB MIDI control.
- **USB type A and B** for computer integration and storage expansion.
- **Foot switch control** through MIDI or 3 button 1/4" jack input.
- **3.5" color TFT display**.
- **Portable Power: Rechargeable battery** with up to 6 hour run time. External 12 Volt power supply included.
- **Storage capacity: Dual SD up to 32 GB each.** 256 MB RAM. USB for hard-drive or flash drive storage. Samples play directly from your storage media so expansion is easy and load times are short.

FEATURES

- Fully illuminated control surface: (Blang) So you can see what you're doing in a dimly lit studio, stage or club.
- **One octave pad layout** with 8 banks so you can bang out beats OR play the keys over 8 octaves.
- **16 layers of velocity sensitivity** per pad for emotive performance. Pad solo and mute for added remix control.
- **On board Effects:** Filters, Delays, Reverb, Chorus, Disintegrator, Overdrive, Distortion, Phaser, Chorus/Flanger, Pitch shifter, Vibrato Vinyl effect and more. The FX are open source LADSPA plug-ins so they are future expandable!
- **Export .wav or .aiff files** of your songs and loops for easy import to your DAW.
- **Import .wav or .aiff** through the USB to use as loops or samples.
- **Record your own samples** directly into the Beat Thang.
- **Fully editable samples** with clear waveform view. Edit start and end points. Normalize, Reverse and Resample to customize your sounds.
- **Auto chop** allows you to quickly create mash up parts and custom kits from your samples. Bust out that vinyl!
- **Easy to use Real-time Sequencer.** Create patterns in real time using quantize, swing, individual bar lengths and tap tempo, then string them together in SONG mode. Step sequencing also available.
- **Mod and Pitch wheels** let you put your own feel and touch to your sequences.
- **Easy to browse file system** that syncs with the Beat Thang Virtual PC application.

Includes the Beat Thang Virtual application. Turn your MAC or PC into an extension of your Beat Thang. Share samples, patterns, songs, kits and instruments across both your hardware and software! Use your Beat Thang to control the software.
